Luna SA Client Licences

> Client Licences apply only to Luna SA units (not Luna SP, Luna PCI, Luna CA4, PSG)

> A client licence grants you the right to connect a server to your Luna SA appliance

> Client licences only need to be purchased for the first HSM in a high-availability group

> Client licences are not currently policed and are on an 'honour' basis, however contact with our support team does reveal how many client licences are in use

> A Luna SA includes one client licence, however in a High Availability environment these 'free' licences cannot be pooled and jointly count as a single licence
